

UNDERGRADUATE SUMMER BRAIN RESEARCH PROGRAM

SUMMER 2020

The University of Nebraska
Medical Center (UNMC)

offers a collaborative undergraduate summer research program in the areas of cognitive neuroscience, data modeling, and human neuroimaging. Accepted applicants complete a 10-week rotation in an affiliated laboratory doing hands-on research.

Join our research teams by sending a resume and interest letter by **February 21st, 2020** for best consideration. Applicants should include their primary research interest and the names of three possible faculty mentors in their interest letter. Final decisions will be made by **February 28th, 2020**.

Faculty Mentors:
